<b>Cluster: K.NBT.A – Work with numbers 11-19 to gain foundations for place value.</b> .....	39
<b>Standard: K.NBT.A.1</b> .....	39
<b>Domain: K.MD – Measurement &amp; Data</b> .....	42
<b>Cluster: K.MD.A – Describe and compare measurable attributes</b> .....	42
<b>Standard: K.MD.A.1</b> .....	42
<b>Standard: K.MD.A.2</b> .....	44
<b>Cluster: K.MD.B – Classify objects and count the number of objects in each category</b> .....	46
<b>Standard: K.MD.B.3</b> .....	46

<b>Domain: K.G – Geometry</b> .....	49
<b>Cluster: K.G.A – Identify and describe shapes.</b> .....	49
<b>Standard: K.G.A.1</b> .....	49
<b>Standard: K.G.A.2</b> .....	51
<b>Standard: K.G.A.3</b> .....	54
<b>Domain: K.G – Geometry</b> .....	56
<b>Cluster: K.G.B – Analyze, compare, create, and compose shapes</b> .....	56
<b>Standard: K.G.B.4</b> .....	56
<b>Standard: K.G.B.5</b> .....	59
<b>Standard: K.G.B.6</b> .....	61

# Go Math! Scope and Sequence

	Introduction	Instruction	Assessment	TOTAL
<b>Chapter 1: Represent, Count, and Write Numbers 0 to 5</b>	1 day	10 days	2 days	13 days
<b>Chapter 2: Compare Numbers up to 5</b>	1 day	5 days	2 days	8 days
<b>Chapter 3: Represent, Count and Write Numbers 6 to 9</b>	1 day	9 days	2 days	12 days
<b>Chapter 4: Represent and Compare Numbers to 10</b>	1 day	7 days	2 days	10 days
<b>Chapter 5: Addition</b>	1 day	12 days	2 days	15 days
<b>Chapter 6: Subtraction</b>	1 day	7 days	2 days	10 days
<b>Chapter 7: Represent, Count, and Write Numbers 11 to 19</b>	1 day	10 days	2 days	13 days
<b>Chapter 8: Represent, Count, and Write Numbers 20 and Beyond</b>	1 day	8 days	2 days	11 days
<b>Chapter 9: Identify and Describe Two-dimensional Shapes</b>	1 day	12 days	2 days	15 days
<b>Chapter 10: Identify and Describe Three-dimensional Shapes</b>	1 day	9 days	2 days	12 days
<b>Chapter 11: Measurement</b>	1 day	5 days	2 days	8 days
<b>Chapter 12: Classify and Sort Data</b>	1 day	6 days	2 days	9 days
<b>End of the Year Planner: Getting ready for Grade 1</b>	3 days	20 days	2 days	25 days
<b>Flex Days (projects, reteaching, standardized testing, etc.)</b>	--	19 days	--	--
<b>TOTAL DAYS</b>	15 days	139 days	26 days	180 days

## Common Core

<b>Domain:</b> K.CC - Counting & Cardinality	
<b>Cluster:</b> K.CC.A – Know number names and the count sequence.	
<b>Standard:</b> K.CC.A.1	
<b>Essential Questions:</b>	<b>Enduring Understandings:</b>
<ul style="list-style-type: none"> <li>• How does the order of numbers help you to count to 50 by ones?</li> <li>• How can you count to 100 by tens on a hundred chart?</li> <li>• How can you use sets of tens to count to 100?</li> </ul>	Students will: <ul style="list-style-type: none"> <li>• Count to 100 by ones and by tens.</li> </ul>
<b>Standards:</b> K.CC.A.1, K.CC.A.2, K.CC.A.3	
<b>Technology Standard(s)</b>	<b>Interdisciplinary Standard(s)</b>
<ul style="list-style-type: none"> <li>• 8.1.P.A.1-6</li> <li>• 8.1.P.B.1</li> <li>• 8.1.P.C.1-2</li> <li>• 8.1.P.E.1</li> <li>• 8.1.P.F.1</li> </ul>	<ul style="list-style-type: none"> <li>• Mathematical Practices               <ul style="list-style-type: none"> <li>○ CCSS.Math.Practice.MP1-8</li> </ul> </li> <li>• Science               <ul style="list-style-type: none"> <li>○ 5.1.P.A.1</li> <li>○ 5.1.P.B.1-3</li> <li>○ 5.1.P.C.1</li> <li>○ 5.1.P.D.1</li> </ul> </li> <li>• Social Studies               <ul style="list-style-type: none"> <li>○ 6.1.P.A.1-3</li> <li>○ 6.1.P.B.1-2</li> <li>○ 6.1.P.D.1-4</li> </ul> </li> <li>• Literacy               <ul style="list-style-type: none"> <li>○ CCSS.ELA-Literacy.SL.K.1-3</li> <li>○ CCSS.ELA-Literacy.SL.K.4-6</li> <li>○ CCSS.ELA-Literacy.RF.K.1-4</li> </ul> </li> </ul>

<b>Student Learning Targets/Objectives</b>	
<ul style="list-style-type: none"> <li>Use a drawing to make 10 from a given number.</li> <li>Count forward to 20 from a given number.</li> </ul>	
<b>Instructional Strategies</b>	

- Ask three boys and one girl to stand. Four children are standing—three boys and one girl. How could we have four children grouped in a different way? Have children model various combinations of boys and girls—all boys; all girls; two boys; two girls; one boy, three girls; etc.
- Have children use manipulatives to create a set of 17 counters and a set of 19 counters. Which set has more/fewer counters? Which number is greater/less? Continue with different sets of 20.

<input checked="" type="checkbox"/> Global Awareness <input type="checkbox"/> Environmental Literacy <input type="checkbox"/> Health Literacy <input type="checkbox"/> Civic Literacy <input checked="" type="checkbox"/> Financial, Economic, Business, and Entrepreneurial Literacy	<input checked="" type="checkbox"/> Creativity and Innovation <input checked="" type="checkbox"/> Critical Thinking and Problem Solving <input checked="" type="checkbox"/> Communication <input type="checkbox"/> Collaboration
<b>Student Learning Targets/Objectives</b>	
<ul style="list-style-type: none"> <li>● Represent 1 and 2 objects with number names and written numerals.</li> <li>● Represent 3 and 4 objects with number names and written numerals.</li> <li>● Solve problems by using the strategy make a model.</li> <li>● Represent 0 objects with a number name and a written numeral.</li> <li>● Represent 6 objects with a number name and a written numeral.</li> <li>● Represent 7 objects with a number name and a written numeral.</li> <li>● Represent 8 objects with a number name and a written numeral.</li> <li>● Represent 9 objects with a number name and a written numeral.</li> <li>● Represent 10 objects with a number a name and a written numeral.</li> <li>● Represent 11 and 12 objects with number names and written numerals.</li> <li>● Represent 13 and 14 objects with number names and written numerals.</li> <li>● Solve problems by using the strategy draw a picture.</li> <li>● Represent 16 and 17 objects with number names and written numerals.</li> <li>● Represent 18 and 19 objects with number names and written numerals.</li> <li>● Represent 20 objects with a number name and a written numeral.</li> </ul>	
<b>Instructional Strategies</b>	
<ul style="list-style-type: none"> <li>● Discuss with children the idea that people write to share information.</li> <li>● Invite children to tell some things that they already know about the numbers 3 and 4.</li> <li>● Use iTools to show a set of five counters. How many counters are in this set? Use counters or iTools to show another set of five counters placed differently. How many counters are in this set? What can you tell about the placement of objects?</li> <li>● Put three counters in your hands and show the class. How many counters are in my hands? Repeat with other numbers to five. Show your empty hands. Now how many counters are in my hands?</li> <li>● Use iTools to make a set of three, four, and five animals. Point to each set and have children describe it. Which set has one more than 3? Which set has one more than 4?</li> </ul>	

- Let children tell some things that they have learned about the number 7. Accept several answers. How does 7 compare to 1? Would you eat seven sandwiches for lunch? Would you eat seven grapes?
- Descriptive questions: Have you ever been to a fair? What kinds of things did you see there? What did you do at the fair?
- Lead children in counting to 9. Think about taking two hops. How far would you go? What about five hops? Now what about nine hops?
- What numbers do you know that are more than 5? Tell some things you know about the number 10. When counting objects, what do you know about the last counting word?
- Is 12 greater or less than 11?
- If you really like happy-face stickers, do you think you would want 11 new stickers or 12 new stickers? Why?
- Have children describe a set of 10 patterned counters using the pattern “10 ones and 1 one”. Continue the pattern through 14.
- Use numeral cards 8-15 and have children select a card and show the numeral with cubes.
- Create a set of 18 objects. How many objects? How many more objects will you need to make a set of 20?

<b>Student Learning Targets/Objectives</b>	
<ul style="list-style-type: none"> <li>Represent 5 objects with a number name and a written numeral.</li> </ul>	
<b>Instructional Strategies</b>	

- Lead children in counting to 5 and clapping five times. Clap various numbers of times and let children tell whether the number of claps is 5 or not.
- How many fingers do you have on each hand? How many toes do you have on each foot? Look around the room. Where do you see the number 5?

<b>Student Learning Targets/Objectives</b>	
<ul style="list-style-type: none"> <li>● Use matching and counting strategies to compare sets with the same number of objects.</li> <li>● Use matching and counting strategies to compare sets when the number of objects in one set is greater than the number of objects in the other set.</li> <li>● Use matching and counting strategies to compare sets when the number of objects in one set is less than the number of objects in the other set.</li> <li>● Make a model to solve problems using a matching strategy.</li> <li>● Use a counting strategy to compare sets of objects.</li> <li>● Solve problems by using the strategy draw a picture.</li> <li>● Solve problems by using the strategy make a model.</li> <li>● Use counting strategies to compare sets of objects.</li> <li>● Solve problems by using the strategy make a model.</li> </ul>	
<b>Instructional Strategies</b>	
<ul style="list-style-type: none"> <li>● Show a set of three counters. How many counters are in this set? Erase the set of counters. How many counters do you see now? Remind children that when you take away all the objects in a set, you have none, or zero objects. Repeat with five counters.</li> <li>● Show two sets of four counters. How can you describe these sets? Now I will put two more in the bottom set. Describe my sets now. Continue with sets of one and three, and two and five.</li> <li>● Hold up your two hands. What can you say about the number of fingers showing on my hands? Children: Hold up one hand showing two fingers. Show more fingers on the other hand. Raise the hand that shows fewer fingers.</li> <li>● Ask a group of three girls to stand next to a group of three boys. How many girls are in this group? How many boys are in this group? In which group is the number of children less? How do you know?</li> <li>● Show a set of five red counters and a set of seven yellow counters. How are the sets alike? How are they different? Continue with a set of seven red counters and a set of five yellow counters.</li> </ul>	

- Show two sets—a set of eight counters and a set of six counters. Describe the two sets. Which set would you rather have? Why? Continue with sets of four and nine, seven and four.
- Place seven chairs in front of the classroom. Have five children come to the front. Are there as many children as chairs? Which set has the greater number? How do you know?
- For more practice with counting sets, show a set of 10 counters and a set of seven counters. Have children describe the sets using the terms *10 and 7 more*. Continue with sets of 18, 19, and 20.

<b>Student Learning Targets/Objectives</b>
<ul style="list-style-type: none"> <li>• Use expressions to represent addition within 5.</li> <li>• Use expressions to represent addition.</li> <li>• Solve problems by using the strategy act it out.</li> <li>• Use expressions to represent subtraction within 5.</li> <li>• Use expressions to represent subtraction.</li> <li>• Solve problems by using the strategy act it out.</li> </ul>
<b>Instructional Strategies</b>
<ul style="list-style-type: none"> <li>• Have a group of two boys come to the front of the classroom. Then have a group of three girls come to the front of the classroom. As you point to the groups ask: How many boys are in this group? How many girls are in this group? Continue with other groups of boys and girls using numbers 10 or less.</li> <li>• Make a row of three red counters followed by two yellow counters. How many red counters are in this row? How many yellow counters are in this row? How can you use the word <i>and</i> to tell about the counters in this row?</li> <li>• Remind children that they have previously used models to solve problems. Tell them that, they are going to use the strategy <i>act it out</i> to solve some problems: Have you ever been playing on your own and then a friend comes to play with you? How many children will you need to act this out? Let children share other experiences that they could act out.</li> <li>• Review with children that they have been learning to put together sets to add. Model the addition expression <math>4 + 1</math>. Explain the steps as you model 4 and 1. Show four counters. How many counters am I starting with? How many counters did I add? Repeat for <math>3 + 2</math>, and <math>1 + 4</math>.</li> <li>• Have five children stand up. Have two of them sit down. How many children were standing up? How many children sat down? Have children discuss the subtraction problem and they say <b>5 take away 3</b> to describe the situation. If time permits, have children act out another example of taking from within 5.</li> <li>• Show five counters in a ten frame. How many counters are in the ten frame? How many counters are left? How can you use numbers and a symbol to show this subtraction? Repeat with other numbers of counters.</li> </ul>

<b>Student Learning Targets/Objectives</b>	
<ul style="list-style-type: none"> <li>• Solve addition word problems within 10 and record the equation.</li> <li>• Solve subtraction word problems within 10 and record the equation.</li> </ul>	

- Understand addition as putting together or adding to and subtraction as taking apart or taking from to solve word problems.

### Instructional Strategies

- Have a class discussion about birds. Where have you seen birds? What is alike about all birds? What is different? What do you know about birds?
- Model the subtraction sentence  $9 - 5 = 4$ . Explain the steps as you model 9 and take away 5. First show nine counters. How many counters am I starting with? Take away five. How many counters did I take away? How many counters are left? Repeat for  $10 - 6$ , and  $8 - 1$ .
- Model addition and subtraction with groups of children. Start with some children and have some more come. Ask children questions such as: How many children are in the set? How many children are added to the set? How many children are there in all? Then have some leave the set. How many children are there in all? How many children went away? How many children are left? Continue adding and subtracting numbers of children.

<input type="checkbox"/> Global Awareness <input type="checkbox"/> Environmental Literacy <input type="checkbox"/> Health Literacy <input type="checkbox"/> Civic Literacy <input checked="" type="checkbox"/> Financial, Economic, Business, and Entrepreneurial Literacy	<input checked="" type="checkbox"/> Creativity and Innovation <input checked="" type="checkbox"/> Critical Thinking and Problem Solving <input checked="" type="checkbox"/> Communication <input checked="" type="checkbox"/> Collaboration
<b>Student Learning Targets/Objectives</b>	
<ul style="list-style-type: none"> <li>• Use objects or drawings to decompose 5 into pairs in more than one way.</li> <li>• Decompose numbers within 5 into pairs in more than one way and record each decomposition with an equation.</li> <li>• Decompose 6 and 7 into pairs in more than one way and record each decomposition with an equation.</li> <li>• Decompose 8 into pairs in more than one way and record each decomposition with an equation.</li> <li>• Decompose 9 into pairs in more than one way and record each decomposition with an equation.</li> <li>• Decompose 10 into pairs in more than one way and record each decomposition with an equation.</li> </ul>	
<b>Instructional Strategies</b>	
<ul style="list-style-type: none"> <li>• Ask children questions to get them thinking about parts that make 5. Show a set of two yellow counters and a set of three red counters. How many yellow counters are there? How many red counters are there? How many counters are there in both sets? Repeat with different sets that make 5. What can you tell about ways to make 5?</li> <li>• Show three red counters and four yellow counters as a blank addition sentence. What addition sentence do the counters show? Change one yellow counter to red so there are four red counters and three yellow counters. Now what addition sentence do the counters show? Discuss how the two number sentences are the same or different. Repeat with other pairs of numbers.</li> <li>• Make two circles on the floor, each large enough for five children to stand in. Have three children stand in the first circle and have two children stand in the second circle. Call on other children to tell how many children are in each circle.</li> <li>• Write 7 on the board. Show seven yellow cubes in one bowl and seven orange cubes in the other bowl. Remove six or fewer cubes from one bowl. Count the cubes aloud with children. Remove additional cubes from the other bowl with children. After children see there are seven cubes in all, call a volunteer to complete an addition sentence on the board. As you continue the activity, be sure to include a number pair with a zero. What would the addition sentence be if I removed seven cubes from one bowl and none or zero cubes from the other bowl?</li> <li>• Review the number and numeral 9. Ask children to count aloud as you stamp 9 counters of your choice on a mat. Then have children record the numeral 9 on paper. Repeat the activity inviting different volunteers to stamp out nine counters of their choice.</li> </ul>	

- Use counters on a ten frame to review numbers and numerals 1 to 10. Say a number from 1 to 10 and have children show the number with counters on a ten frame. Remind them to start at the top and fill left to right. Then have them write the matching numeral on their MathBoards/paper.

<b>Instructional Strategies</b>	
<ul style="list-style-type: none"> <li>• Provide children with counters and present these directions, one step at a time. Put five counters, red side up, in a row in front of you. Put one counter, yellow side up, below each of these counters. Now you have a red row above your yellow row. How many red counters are there? Turn over one of the yellow counters. How many red counters are there now? Turn over the other yellow counters. How many red counters are there now?</li> <li>• Call one child to the front of the room, and explain that you need a circle of 11 children. How many more children would I need to make 11? Ask children how they found the answer. Make sure they know that 1 and 10 more make 11. Discuss with children how this is like using ten frames, but starting with the “one” instead of the “ten”. Repeat with two children and make the number 12.</li> <li>• Show children 13 counters scattered on a table. How could I count these counters? Would it be easier to count on from a full ten frame or to count each counter by one? Repeat for the number 14.</li> <li>• Ask children to draw 15 objects. Count to 15. Have children erase one object and then recount the set. Continue until zero are left.</li> <li>• Review the number 17 with children by asking the following questions: How many children are here today? With children, count out 17 sheets of paper. If I have 17 papers, will it be enough for this class? Why or why not?</li> </ul>

<b>Student Learning Targets/Objectives</b>	
<ul style="list-style-type: none"> <li>• Directly compare the lengths of two objects.</li> <li>• Directly compare the heights of two objects.</li> </ul>	

- Solve problems by using the strategy draw a picture.
- Directly compare the weights of two objects.

### Instructional Strategies

- Hold up a new crayon and a broken crayon. Suppose you have a new crayon. Your friend has a broken crayon. Why might you want to compare the two crayons? Continue the discussion using examples of other pairs of similar objects, eliciting from children why they might want to compare them.
- Practice comparing lengths with objects and counters. What do you notice about the longer lines and the number of counters?
- Have a pair of children come to the front of the class. Use the words *shorter than* to describe these children. Use the words *taller than* to describe these children. Repeat with another pair of children.
- Ask children to draw a row of 15 evenly-spaced dots. Count the 15 dots together. Do you think a row of 20 evenly-spaced dots of the same size would be shorter or longer? Do you think a row of 10 evenly-spaced dots of the same size would be shorter or longer?

<b>Student Learning Targets/Objectives</b>	
<ul style="list-style-type: none"> <li>• Use the terms above and below to describe shapes in the environment.</li> </ul>	

- Use the terms *beside* and *next to* to describe shapes in the environment.
- Use the terms *in front of* and *behind* to describe shapes in the environment.

### Instructional Strategies

- Construct a box with an opening at one end to allow children to reach inside and identify a shape by touch. Place several objects of different shapes into the box and see if children can identify the shapes.
- Show the following shapes in a row: cylinder, sphere, cube. Left aligned and directly below this row, show a sphere, cube, and cylinder. Have children name each solid shape. What is the shape that is above the cylinder? What is the shape that is below the cylinder? Continue questioning children about the position of the shapes, using the terms *above* and *below*.
- Have children use objects to demonstrate positions of things in the classroom. Have a child stand next to the first child. Repeat the activity with several children using different objects in the classroom.

<b>Student Learning Targets/Objectives</b>	
<ul style="list-style-type: none"> <li>• Identify and name two-dimensional shapes including circles.</li> <li>• Identify and name two-dimensional shapes including squares.</li> <li>• Identify and name two-dimensional shapes including triangles.</li> <li>• Identify and name two-dimensional shapes including rectangles.</li> <li>• Identify and name two-dimensional shapes including hexagons.</li> <li>• Identify, name, and describe three-dimensional shapes including spheres.</li> <li>• Identify, name, and describe three-dimensional shapes including cubes.</li> <li>• Identify, name, and describe three-dimensional shapes including cylinders.</li> <li>• Identify, name, and describe three-dimensional shapes including cones.</li> </ul>	
<b>Instructional Strategies</b>	
<ul style="list-style-type: none"> <li>• Invite children to explore shapes. How could you sort the shapes? Decide how you want to sort. Then sort a handful of shapes. Have children share their sets and explain how they sorted them.</li> <li>• Show a circle. How would you describe this shape? What is the name of this shape? Show the name of the shape to children. Have them repeat the word <i>circle</i> to you. Trace a circle in the air.</li> <li>• Make a large square on the classroom floor using masking tape. Invite children to take turns walking on the square. Have children count each side as they walk on it. Then ask a volunteer to stand inside or outside the square.</li> <li>• Show each shape: square and triangle. Have children identify and name each shape. Then have children count the number of straight sides and vertices. You can repeat the activity, putting the shapes in a different order.</li> <li>• Draw a puppet shape on the board with a circle for the head, a rectangle for the body, squares for the legs, and a triangle for a hat. What shape is the puppet's head? What shape is the puppet's body? What shape is the puppet's legs? What shape is the puppet's hat?</li> <li>• Show a cylinder, sphere, and cube. Place the sphere and cylinder in one set and the cube in another. Point to the sphere and cylinder set. These shapes are all alike. How are they alike? How are these shapes sorted?</li> <li>• Brainstorm with children a list of balls that people use for sports. Display sports balls such as a soccer ball, basketball, tennis ball, football, baseball, softball, and golf ball. What is alike about all the sports balls? Are all of the sports balls spheres? Why is a sphere a good shape for a ball?</li> </ul>	

- Show a sphere and a cube side-by-side. Have children name each shape. How are these shapes alike? How are they different?
- Hold up a sphere. What is the shape? What are some objects shaped like a sphere in the classroom? Repeat with a cube and a cylinder.

<b>Domain:</b> K.G – Geometry	
<b>Cluster:</b> K.G.B – Analyze, compare, create, and compose shapes.	
<b>Standard:</b> K.G.B.4	
<b>Essential Questions:</b>	<b>Enduring Understandings:</b>
<ul style="list-style-type: none"> <li>• How can you describe circles?</li> <li>• How can you describe squares?</li> <li>• How can you describe triangles?</li> <li>• How can you describe rectangles?</li> <li>• How can you describe hexagons?</li> <li>• How can you use the words <i>alike</i> and <i>different</i> to compare two-dimensional shapes?</li> <li>• How can you show which shapes stack, roll, or slide?</li> </ul>	<p>Students will:</p> <ul style="list-style-type: none"> <li>• Analyze and compare two- and three-dimensional shapes, in different sizes and orientations, using informal language to describe their similarities, differences, parts (e.g., number of sides and vertices/“corners”) and other attributes (e.g., having sides of equal length).</li> </ul>
<b>Standards:</b> K.G.B.4, K.G.B.5, K.G.B.6	
<b>Technology Standard(s)</b>	<b>Interdisciplinary Standard(s)</b>
<ul style="list-style-type: none"> <li>• 8.1.P.A.1-6</li> <li>• 8.1.P.B.1</li> <li>• 8.1.P.C.1-2</li> <li>• 8.1.P.E.1</li> <li>• 8.1.P.F.1</li> </ul>	<ul style="list-style-type: none"> <li>• Mathematical Practices <ul style="list-style-type: none"> <li>○ CCSS.Math.Practice.MP1-8</li> </ul> </li> <li>• Science <ul style="list-style-type: none"> <li>○ 5.1.P.A.1</li> <li>○ 5.1.P.B.1-3</li> <li>○ 5.1.P.C.1</li> <li>○ 5.1.P.D.1</li> </ul> </li> <li>• Social Studies <ul style="list-style-type: none"> <li>○ 6.1.P.A.1-3</li> <li>○ 6.1.P.B.1-2</li> <li>○ 6.1.P.D.1-4</li> </ul> </li> <li>• Literacy <ul style="list-style-type: none"> <li>○ CCSS.ELA-Literacy.SL.K.1-3</li> <li>○ CCSS.ELA-Literacy.SL.K.4-6</li> <li>○ CCSS.ELA-Literacy.RF.K.1-4</li> </ul> </li> </ul>
<b>21<sup>st</sup> Century Themes: (Check all that apply)</b>	<b>21<sup>st</sup> Century Skills:</b>
<input checked="" type="checkbox"/> Global Awareness <input checked="" type="checkbox"/> Environmental Literacy <input type="checkbox"/> Health Literacy <input type="checkbox"/> Civic Literacy <input type="checkbox"/> Financial, Economic, Business, and Entrepreneurial Literacy	<input checked="" type="checkbox"/> Creativity and Innovation <input checked="" type="checkbox"/> Critical Thinking and Problem Solving <input checked="" type="checkbox"/> Communication <input checked="" type="checkbox"/> Collaboration
<b>Student Learning Targets/Objectives</b>	

- Describe attributes of circles.
- Describe attributes of squares.
- Describe attributes of triangles
- Describe attributes of rectangles.
- Describe attributes of hexagons.
- Use the words alike and different to compare two-dimensional shapes by attributes.
- Analyze and compare three-dimensional shapes by attributes.

### Instructional Strategies

- Use six circles to draw a caterpillar on the board. What shape do you see repeated in my caterpillar? How many circles do you see? Invite children to draw their own caterpillars using six or more circles.
- Have children make models of squares using clay and toothpicks. Roll the clay into four small balls for the corners. Press the ends of four toothpicks into the clay to form a square. Make sure the shape lies flat and is closed. What shape do you have? How do you know it is a square?
- Have children make models of triangles using clay and toothpicks. Roll the clay into three small balls for the corners. Press the ends of three toothpicks into the clay to form a triangle. Make sure the shape is closed. What shape do you have? How do you know it is a triangle?
- Have children make models of rectangles using clay and toothpicks. Roll the clay into four small balls for the corners. Press the ends of four toothpicks into the clay to form a rectangle. Make sure the shape lies flat and is closed. What shape do you have? How do you know it is a square? My rectangle has four sides of the same length. Is it still a rectangle? Explain.
- Draw the following on the board in a row: a triangle and a rectangle. On your Mathboard/piece of paper draw these two shapes. What are the names of the shapes? Count the straight sides in these shapes and write the number of straight sides in the center of the shape.
- Hold up a paper bag filled with shapes. Ask children to guess what is inside the bag. Have volunteers take turns reaching inside and pulling out one shape at a time, naming the shape, and telling something about the shape.
- Describe an object in the classroom by listing two of its attributes. Have volunteers take turns finding the object. Model your descriptions similar to the following: Find a toy that is round and red. Find a crayon that is black and pointed. Find a paper that is a rectangle and is white.
